

Easy-Fix CS Countersunk Glass Fixing -10-12mm Glass (Model: H0330)

- The smallest point fitting for the interior mounting of elements in glass thickness of 10 and 12 mm.
- Easy-Fix CS 10/12 is made of high quality plastic, in transparent design and covered with different visually appealing cover plates in nickel (Stainless Steel Like).
- The soft support plate keeps the element to be fastened at a distance to the substructure. Thus, the point fitting can also be used as a spacer for the transport.
- Easy-Fix CS 10/12 is suitable for wall cladding, mirrors, glass signs, kitchen splashbacks, furniture and sanitary facilities.
