

All Terrain Dolly With Suction Cup - 180kg Capacity (Model: B0090)

This simple, robust transport unit makes transporting windows, glass plates and other loads up to 180 kg on rough terrain so much easier. Because the transport unit does not support any part of the load until it is loaded and secured, 3 or more workers are needed to handle loads of more than 90–180 kg. Two workers can stabilise and support the load while the third secures the transport unit. 90 kg with 2 users. Typically, a glass plate is set on the stand area. The plate is then secured using a hand lifting unit by pushing the pump cylinder in 2 or 3 times. This device can be used to transport any air tight object such as metal, stone, glass, plastic etc..
