

Static Vent-A-Matic PBS (Model: M0019)

The Vent-A-Matic is a durable and effective in-glass ventilator that can solve most ventilation requirements. The PBS is equipped with an integral stormguard as standard, to reduce draft. Designed for use where continuous ventilation is mandatory. Marked with free air space to conform with gas board recommendations.

- Requiring a 159mm diameter hole.
- Ideal for any room fitted with a gas or solid fuel appliance.
- Useful for open fires and woodburning stoves, providing a continuous supply of fresh air to the combustion process. Therefore alleviating the build up of harmful gases.
- Secured by a central brass bolt from the inside, which cannot be removed from the outside.
