

ROBUSTUS Top Twin Guide - Flocked (Model: GSTR001)

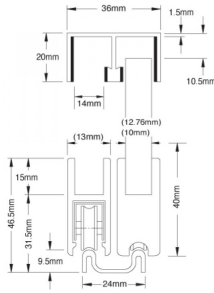

- Robustus is a fittings system for glass thicknesses from 10mm to 12.76 mm.

- It can be used in a range between 70 kg (2 rollers) and 140 kg (4 rollers) and is therefore also suitable for security glass.

- The option of a lateral frame profile section with damper profile protects the glass at the edges and stops dust.

- Adjustable end position damping devices stop the glass from striking the lateral frame and at the same time prevent it from being lifted off.

- [Click here for Glass Width Dimensions Guide.](#)

Technical specifications

Maximum load
 2 x GSTR006 = approx. 70 kg / 4 x GSTR006 = approx. 140 kg

Glass Door Height = Installation Height,
 less 42mm (when used with 12mm, 12.76mm Glass),
 less 44mm (when used with 10mm Glass)

Glass Door Width when using GSTR005 = Installation Width,
 less 22, divided by 2, plus 14mm
