

ROBUSTUS Bottom Twin Track (Model: GSTR003)

- Robustus is a fittings system for glass thicknesses from 10mm to 12.76mm.
- It can be used in a range between 70 kg (2 rollers) and 140 kg (4 rollers) and is therefore also suitable for security glass.
- The option of a lateral frame profile section with damper profile protects the glass at the edges and stops dust.
- Adjustable end position damping devices stop the glass from striking the lateral frame and at the same time prevent it from being lifted off.
