

EaziRail Handrail Base Profile - 3000mm - Anodised (Model: K.EZAL.HR.002.AN)

- This easy to install optional handrail system can be used in two ways.
 1. Where there is a gap between it and the glass underneath or
 2. Where the glass slots up into the base channel creating a better windbreak.

- It is supplied in two parts, the base profile that is easily fixed to the post and then a snap on cover profile.

- This product is aluminium so it is more easily cut and worked with than traditional stainless steel.

- M8 x 25mm Stainless Steel bolts are recommended for attaching the base profile to the post(s), and should be purchased from a fastener specialist.
