

GRABO Electric Vacuum Lifter With Gauge and Case - 120kg (Model: B0007A)

- Grabo 120kg Capacity with Glass and other air tight, smooth surfaces.
- Adheres to rough surfaces, where traditional suction cups are only capable of creating a good seal with flat, clean and airtight surfaces such as glass.
- Supplied with one battery and a robust carrying bag included as standard.
- The maximum surface roughness which Grabo can attach to depends on the exact *Profile roughness parameters* (The geometry of peaks and valleys in the material), and is generally limited to an amplitude of about 2.5mm (0.1 inch).
- This capability allows Grabo to create a seal with the majority of patterned tiles, pavers and construction materials such as drywall slabs, concrete slabs.

Attributes:

Product Code: B0007A

Unit Of Sale: Each

Textured Granite

Concrete

Patterned Steel

Tombstone

Door

Car Windshield

Flagstone

Textured tiles

Textured glass

Drywall

Tiles

Wood

Manhole Cover

Sand stone slabs

Concrete pavers

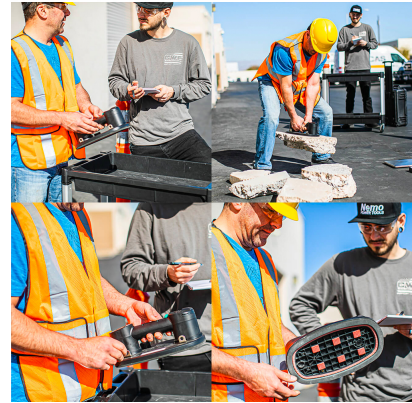

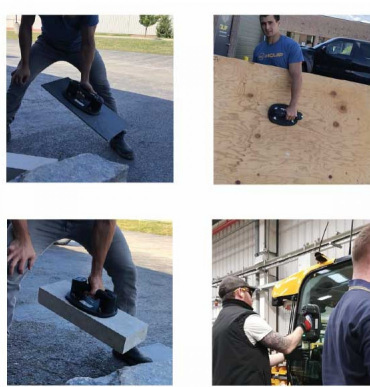

Concrete pavers

Bluestone pavers

Quartz

Model	GRABO Plus (B0007A)	 
Cauge type	Analogue (PSI, bar)	
Green switch type	Manual on/off	
Handle type	Standard (<45mm Ø)	
Rated power	160W	
Charger input voltage	100-240VAC 50/60Hz	
Battery charging time	<2hrs	
Non-stop running time	90min	
Battery	14.8VDC 2600mAh Li-ion	
Battery stand by	30 days	
Pump service life	100,000+ on/off cycles / 800+ hrs continuous action	
Rated air flow	0.7cfm (20 L/min)	
Maximum vacuum rate	11.6PSI (0.8 Bar, 83kPa)	
Maximum lifting capacity	770kg	
Working temperature	0°~40°C	
Kit contents	1 x seal, 1 x battery, 1 x charger, 1 x fabric bag	
Warranty	1 year warranty as outlined on www.thegrabco.uk/warranty	
Net weight (with battery)	1.6kg	
Dimensions (LxWxH)	297 x 181 x 121mm
