

Merlin Lazer D.G Measuring Device (Model: C0019)

Fast - measure unit thickness for replacement purposes.
 Accurate - identify laminated glass in any situation, ideal for risk assessments
 Quick - just point & click, glass & air-gap thickness are displayed on the calibrated scale. No glass removal necessary. The Merlin Lazer Gauge is a new tool that will revolutionise the way you work and improve your productivity making it the perfect tool for any surveyor who needs to quickly and accurately identify and measure glass in situ. A remarkably simple but effective precision measurement instrument it allows accurate measurement of glass and air-gap thickness in single, double and triple glazed units. Simply place the tool onto the corner of the unit and a precise measurement for each piece of glass and the air-cavity will be shown on the calibrated scale.
