Nedo Messtronic Easy 3Mtr Electronic Measuring Device (Model: C0027)

This is an easy-to-use electronic measuring tool for the skilled tradesman. Simply place the messtronic in position, pull out the extending sections and read off the measurement from the digital display. The zero function allows to set reference points for relative measurements. Deviations from the reference points are calculated automatically. The hold button permits the measured value to be retained in the display. In this way, a measurement can be taken in an inaccessible place and then be read off at a more convenient time. The two models cover all typical measuring tasks entailed in building operations.
